

U-CRANE Dynamic

The U-CRANE Dynamic (orig. name Autorobot Mini) is a high performance robotic camera arm for dynamic filming. This lightweight, agile and highly mobile arm can be mounted on a roof of camera car, picture car, truck, boat and other mobile platforms. It delivers speed, cutting edge creativity, new camera angles and perspectives, stunning volumetric footages and stable shots. It is compact enough to shoot under low bridges, in tunnels, inside of buildings. Racetracks, curvy mountain roads, sharp corners and narrow streets are its favorite playgrounds. U-CRANE Dynamic brings action, beauty and engagement in every scene.

- Original Academy Award Winning technology
- Remotely operated from a vehicle cabin
- Used with a stabilized Flight Head
- Precise and responsive control
- Highly productive and versatile camera arm
- Smart balance technology
- Control: Joystick
- Individual presets
- Limits

SPECS:

Pan: 360° (≠ 3 rotations)

Pan speed max: 4.5sec

Tilt: ±45°

Weight with camera: 180kg

Payload: 34kg

POWER REQUIREMENTS:

48V DC

0,2A Standby

30A Dynamic Max
